

The Dream Fields

Verse 1

I can smile and laugh with you
Share a memory at the bar
Hug and hold and talk of old
But inside my minds afar
Far from the dream fields
Where thoughts were swung aside
The black dog now wants to walk
Leash pulling at my side

Chorus

Far from the dream fields
Where life will carry on
Far from the dream fields
Where there's no right or wrong
Far from the dream fields
Where we made our history
Until we meet again my friend
Here's to you and here's to me

Verse 2

The north wind is blowing
On mind and adversity
While dark clouds linger
A light shine's perfectly
But not with you mortal souls
That fight with gravity
It's elsewhere in another realm
An Aird, a galaxy

Chorus

The Dream Fields

Verse 3

In my prime, It's now my time
To change course on this road
Where to start on mind and heart,
Door unlatched to my abode
That of a new world
Without despondency
Now the shadow of my soul
Stands by you constantly

Chorus
